

ABOUT ME

I initially pursued a career as a civil engineer in Argentina. However, my passion for design and technology led me to venture into international brand creation, prototyping, and application development. I also launched a YouTube channel to discuss branding and design approaches.

Currently, I am looking for job opportunities in tech companies engaged in innovative and challenging projects. After all, I love solving problems with design and code.

SKILLS

React.js, JavaScript, TypeScript, Python, HTML, CSS, WordPress, Firebase and Adobe CC (Illustrator, XD, Photoshop, Premiere Pro & After Effects).

LANGUAGES

Spanish (native) and English (advanced).
